

# Macrex at ISC/SCI 2022

## with Do Mi Stauber

### Support Resources

Macrex is now a free program, with an optional donation (see below).

- Hilary Calvert: [macrex@macrex.myzen.co.uk](mailto:macrex@macrex.myzen.co.uk)
  - programming, tech support, invite to international email list
- Do Mi Stauber: [dmstauber@gmail.com](mailto:dmstauber@gmail.com)
  - North America tech support, invite to chat and North American email list, installation files and instructions
- Biweekly chat on Canvas (free). Our friendly group of Macrex users discusses Macrex, indexing in general, business, technology, and life in general. No question is too simple.
  - Extensive Evernote resources compiled by Gale Rhoades are available to chat members. ([dmstauber@gmail.com](mailto:dmstauber@gmail.com) for invite)
- North America email list: [NorthAmericanMacrex@groups.io](mailto:NorthAmericanMacrex@groups.io) ([dmstauber@gmail.com](mailto:dmstauber@gmail.com) for invite)
- International email list: [macrex-international@googlegroups.com](mailto:macrex-international@googlegroups.com) ([macrex@macrex.myzen.co.uk](mailto:macrex@macrex.myzen.co.uk) for invite)
  - Both email lists have experienced users ready to answer questions.
- Mastering Macrex video series: <https://www.youtube.com/user/MacrexNA>
- Making the Most of Macrex webinar through ASI: <https://www.asindexing.org/webinars/stauber-macrex/>

Optional donation to support the Macrex website, excess to the Progressive Supranuclear Palsy Association: Paypal [macrex@macrex.myzen.co.uk](mailto:macrex@macrex.myzen.co.uk).

## Why Users Love Macrex!

### **Working immersed in the index; the program follows our thinking process**

- Track added entry: new entry appears in sorted index context
- Easy switch between navigation and add entry modes
- Easy in and out of group mode
- Extensive keyboard shortcuts
- Multiple methods for most tasks; find your preferred sequences

### **Powerful automation; never type anything twice**

- Use parts of previous entry (yank, flip, underline, enter)
- Powerful Table of Authorities/autocomplete
- Unlimited keywords (abbreviations), easy to define using copy/paste
- 48 possible macros, easy to record, can be saved in sets for re-use

### **Extensive options with user control**

- Diacritic coding for any unicode character
- Save sets of options for specific clients and uses, no need to repeat the options process
  - Working options
  - Sort options
  - Options for locators and cross-references
  - Output format and style options
  - Unicode sets
  - Keyword and macro sets
- All options files can be edited for wide control; choices rarely dictated by program
- Say yes to any publisher request!
